

Proposed Website for the informatics team

Website Structure & Content Suggestions

Here's a proposed site map with content ideas for each section:

1. Home

- Brief overview of the Informatics Department
- Key message or mission statement
- Carousel or highlights (e.g., current projects, system stats, new releases)
- Quick links to supported systems (AMRS, ATP, REDCap)

2. About Us

- Departmental structure
- Vision, mission, and core values
- Roles of the department in supporting digital health
- Leadership or focal persons (can include photos and short bios)

3. Teams

Sub-pages or sections for:

- **Developers** – responsibilities, current tools/technologies used
- **System Admins** – infrastructure supported, uptime reports
- **Quality Assurance** – testing procedures, key tools
- **Implementation & Support Team** – field activities, onboarding processes
- **Attachés/Interns** – capacity-building approach, testimonials

4. Systems We Support

- **AMRS** – overview, link to documentation, access portals
- **ATP** – purpose, integration workflows, demo links
- **REDCap** – data collection workflows, support materials
- Add icons/logos and system-specific resources or contacts

5. Projects & Initiatives

- Ongoing and completed projects
- Impact stories or user testimonials
- Reports or research findings

6. Resources

- Training materials
- SOPs and guidelines
- System documentation
- Downloadable tools and scripts

7. News & Updates

- Blog-style updates on deployments, bugs, fixes
- Announcements for training, releases, etc.

8. Contact Us

- Email, phone, physical location
- Contact form

- Map
